

Problem

- Tracking Site Downtimes
- Production Planning
- Manage Site Instrumentation
- Calibration Planning

Solution

e-Tools is a bundle of software tools, by which you can keep under control all of your site's instrumentation and plan calibration & certification processes. You can plan production and save downtimes, analyzing the effect of downtimes on production.

Technology

Multiple clients can simultaneously connect to the remote server. All data are securely stored on SQL Database. Email warnings are automatically sent upon critical events
